Welcome

Welcome to DCU, a young, ambitious and innovative university with a mission to 'transform lives and societies'. We are proud to rank among the Top 400 of the world's universities.

At DCU, our primary goal is to provide a 'transformative student experience'. Our postgraduate programmes are designed to help you develop the knowledge and skills you need to flourish in a fast-changing world. Whether you wish to move forward in your career, advance in an area you are passionate about, or change career paths completely, we have a postgraduate course for you.

This University is known for its innovative Teaching and Learning, and our inspiring teachers are recognised for their personalised 'human touch' approach. In addition, DCU has always had a productive relationship with enterprise and leading employers. This ensures that our programmes are highly relevant to today's workplace, and undoubtedly contributes to DCU's consistently high Graduate Employment Rate.

DCU is ranked 301 in the world for its research environment, and it is this global reputation that underpins our postgraduate programmes. The University is home to leading research centres in areas such as educational assessment and evaluation, bullying prevention, human rights, cellular biotechnology, neurotherapeutics, sensors, plasma technology, biomedical diagnostics, machine translation, cloud computing, data analytics and more.

As well as our academic excellence, DCU is known for its welcoming and diverse campuses, hosting international students from 135 countries. We can also proudly boast of our superb sports complex, our renowned performing arts centre, The Helix, and our state-of-the-art student centre, the U. More than 120 DCU student clubs and societies add greatly to a vibrant social environment.

I hope this prospectus gives you a snapshot of all that we offer our postgraduate students. I would particularly encourage you to read the testimonials of our graduates, who explain what postgraduate study at DCU has meant for them. You can also find a wealth of additional information and content at: dcu.ie/postgraduate

Thank you for exploring DCU, and I hope I will have the opportunity to welcome you here in person, in the near future.

Professor Dáire Keogh
President, DCU

Introduction to DCU

Studying in Dublin

Wherever you are from, the city of Dublin probably doesn't need much introduction.

From its museums and galleries to its historical landmarks, Dublin is rich in history. Meanwhile, its friendly social scene, lively music venues and on-trend cafes and restaurants give the city a uniquely 21st-century atmosphere. The Dublin skyline reflects this vibrant mix, from the space-age modernity of the Aviva Stadium to the medieval grandeur of Saint Patrick's Cathedral.

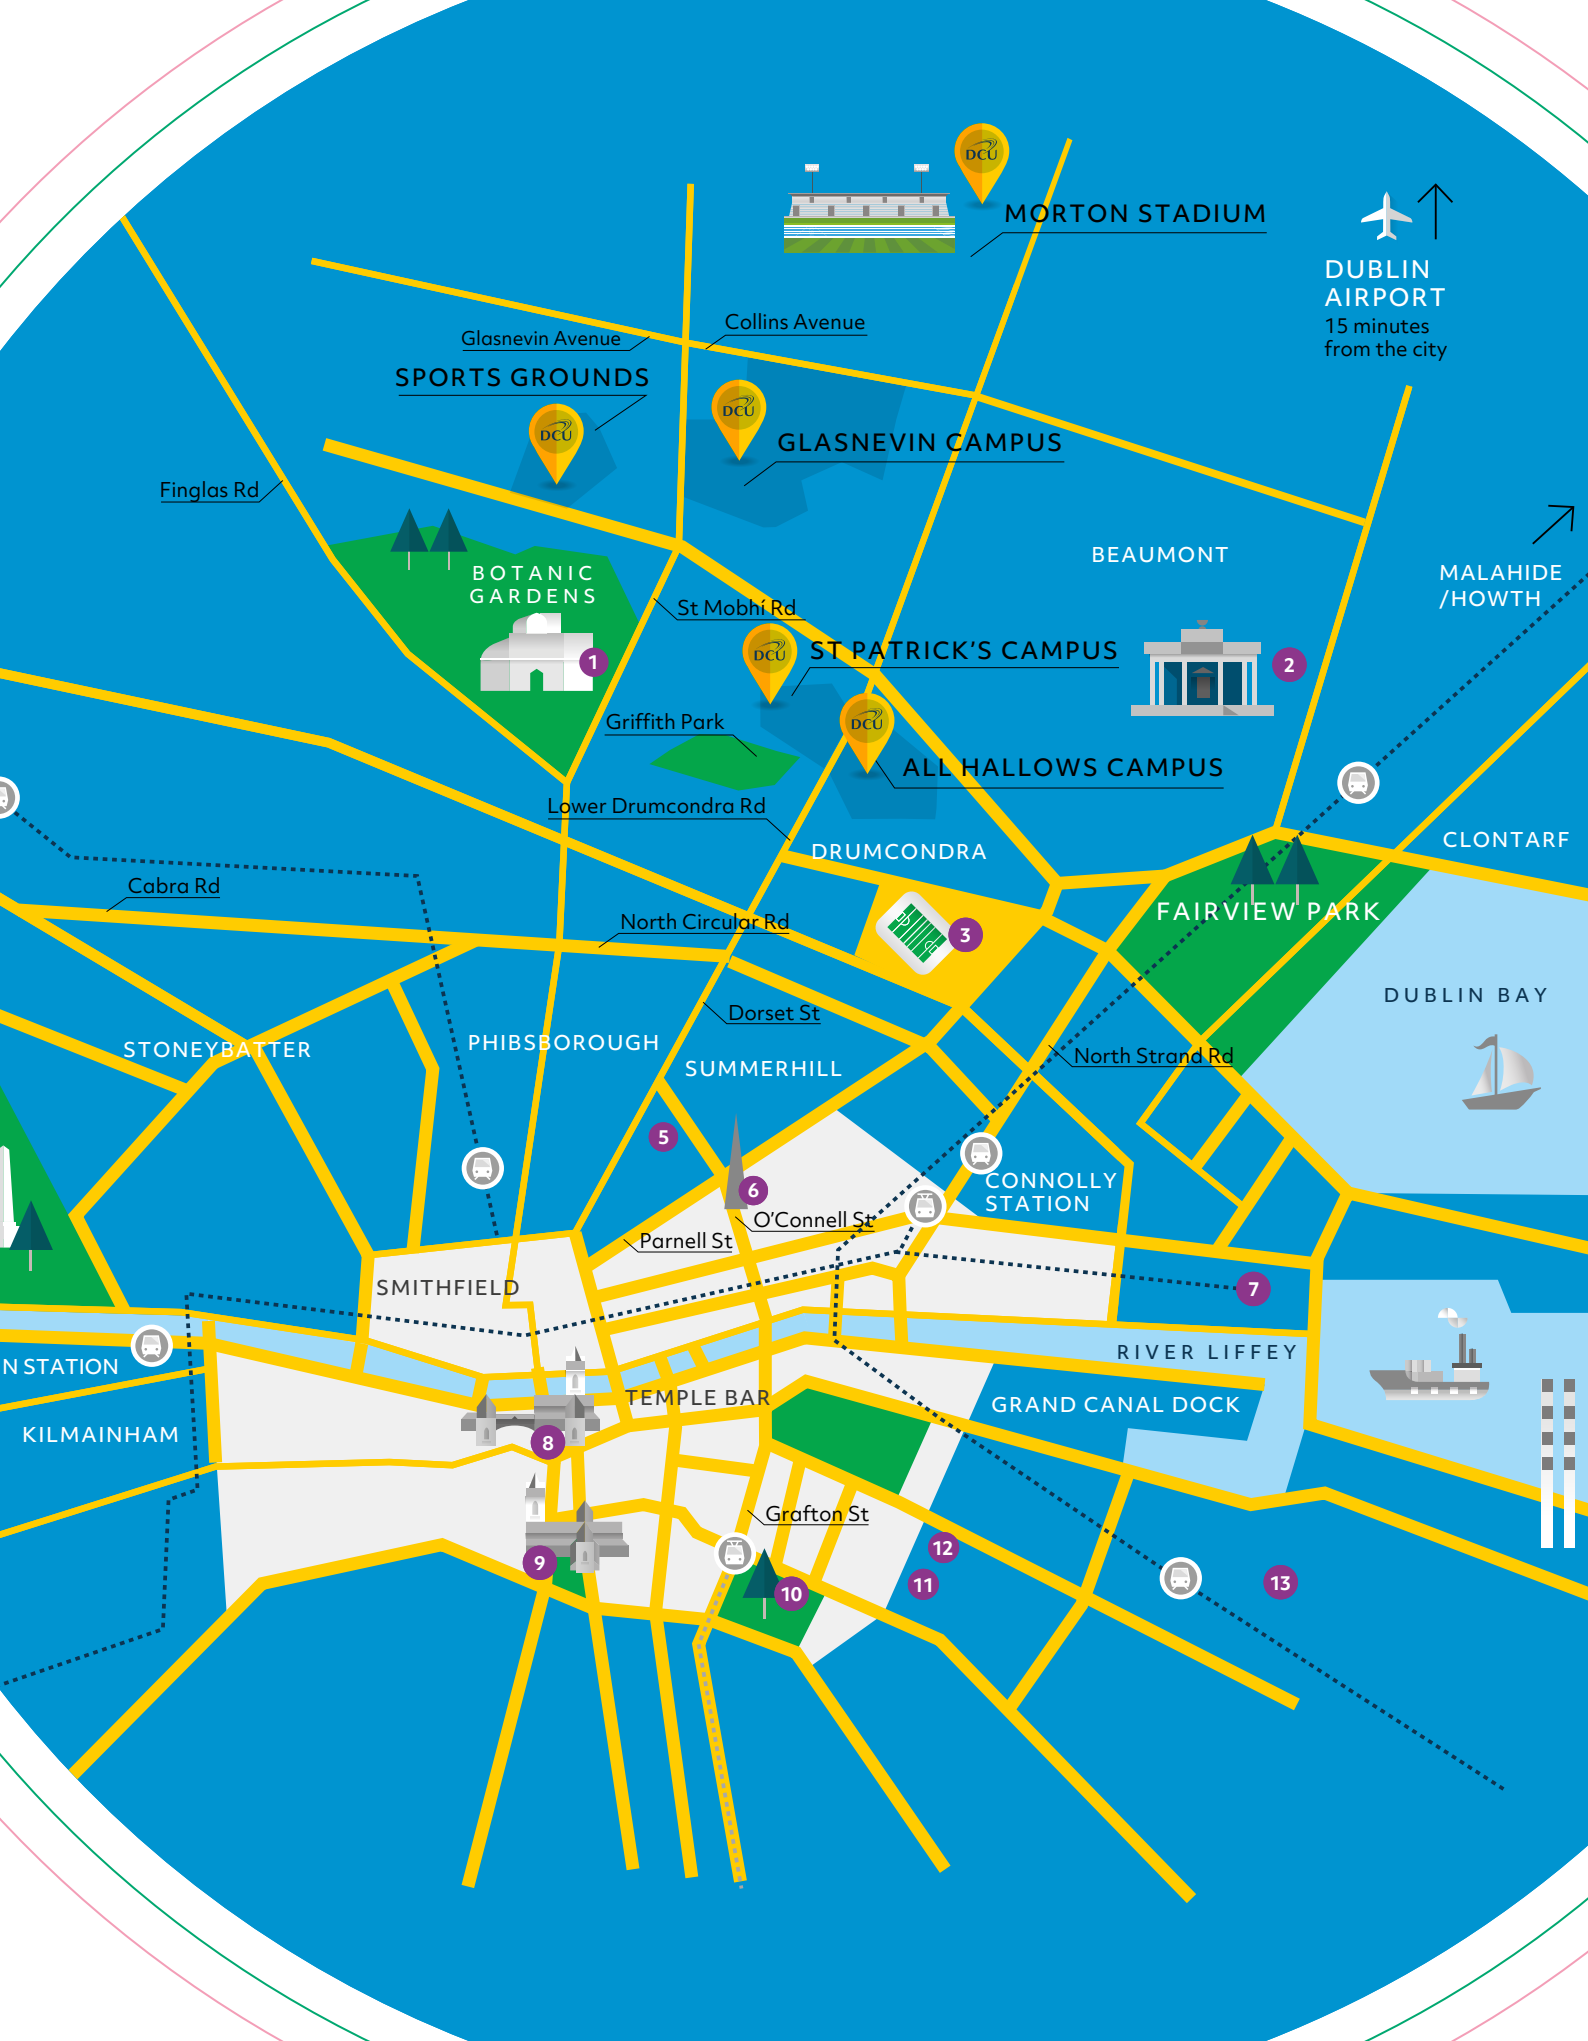

It's safe to say that Dublin is a city of surprises and contrasts. It is proud of its Irish identity, while closely linked to the rest of Europe. It's a fast-moving metropolitan city with the sea, mountains and countryside on its doorstep and easily accessed by public transport. At DCU, you'll also discover the contrasting atmosphere of our three campuses, which blend the modern with the historic.

All in all, Dublin is a city where you can study for success.

Why go Further?

Some people undertake postgraduate studies to obtain a professional accreditation. Others do so because they are passionate about an issue and postgraduate research provides a structured, supportive environment in which to follow that passion.

Whatever programme you choose, our dedicated academic staff will inspire you to discover new ways of thinking about your subject. Our academics and research teams are innovators making a global impact

and addressing the major challenges facing the world today, and you can be part of that journey here at DCU.

Throughout your programme, our careers service will be on hand to guide you through postgraduate job opportunities. We provide the very best facilities and support to ensure that you get what you want out of your postgraduate experience. Whatever your reason to go further, go further with DCU.

Research Intensive University

Research and Innovation at DCU stems from the academic excellence of its five faculties, coupled with a passion for translating knowledge into positive social and economic impact.

We recognise that international collaboration is essential in order to make significant and sustained advances in tackling some of the major research challenges facing the world today. We promote and support international research collaboration while also taking particular account of geo political developments.

Here at DCU we bring together world-leading multidisciplinary teams of researchers, capable of addressing significant challenges to generate innovative solutions, and who have access to cutting-edge infrastructure and facilities.

DCU has several specialised research centres and hosts others that involve collaborations with higher education institutions and industry in Ireland and across the globe.

Inspiring Academics

Dr James Carton

Faculty of Engineering
and Computing
james.carton@dcu.ie

James Carton is the Chair of the Master's (MEng) and sustainability postgraduate awards (GCert and GDip) in Mechanical and Manufacturing Engineering at DCU, accredited by Engineers Ireland.

"Engineering is about asking questions, solving problems, designing and creating new solutions. Engineers are the craftspeople who use every available tool to design the world around us! A key feature therefore of the Mechanical and Manufacturing Engineering postgraduate programmes is that we allow our students to be engineers from the day they start.

We introduce students to a vast array of tools, for them to use their knowledge and skills to select the right approach and apply the correct methodology to solve complex analytical, mathematical, technical, computational or economic challenges they are faced with.

We adapt our teaching to engage real world industry-relevant problems that resonate with students and their prospective employers. We offer students the choice of opting for a specialist Major in one of four areas: Simulation-driven Design, Advanced Manufacturing, Sustainable Systems and Energy, or Biomedical Engineering.

Our teaching goes beyond one-dimensional technical solutions and penetrates holistically into the socio-economic, regulatory and policy spheres that are often the real barrier to creating a sustainable future. The Mechanical and Manufacturing Engineering postgraduate programmes are highly flexible to align with diverse student cohorts; the logical investigator, the designer, the manufacturer, the activist, the implementer and also those motivated students who work in industry at the same time as they study - our programme suits anyone who wants to progress into a more exciting, rewarding career."

Dr Mathieu Mercadier

DCU Business School
mathieu.mercadier@dcu.ie

Mathieu Mercadier is the programme chair of the new MSc in Business Analytics. He is a researcher and lecturer in business analytics, with a focus on the intersection of finance, statistics, and machine learning.

"Like many of us, I have often wondered how we can make better decisions when the future is uncertain. That curiosity shaped my path, beginning with studying Economics and Quantitative Finance, and leading to a decade-long career in the financial sector. There, I discovered another computational approach to decision-making: Machine Learning, a powerful set of tools capable of uncovering patterns, enhancing predictions, and supporting decisions in ways traditional models could not.

While machine learning applied to finance remains a key focus of my research, a broader field has opened its doors to me: Business Analytics, an area that brings together the tools, techniques, and frameworks that help organisations make faster, smarter, evidence-based decisions.

What drives me today is the belief that data, when used responsibly and intelligently, can help solve real-world problems. But making the most of data requires more than technical skills. It demands critical thinking, business acumen, ethical awareness and strong communication skills. This is the mindset I strive to instil in my students, and this is why I designed the MSc in Business Analytics.

Students learn in an environment that reflects the real world, through challenge-based learning, virtual reality presentations, access to a new AI-ready Analytics Lab, and client-sponsored projects.

In an increasingly data-driven world, there is a critical need for people who can turn complexity into clarity and insight into action. This is more than a technical field; it is a way to shape the future. And that is why I do what I do."

Aisling Murray Fleming

DCU Institute of Education
aisling.fleming@dcu.ie

Aisling Murray Fleming is Chair of the MSc and Postgraduate Diploma in Guidance Counselling programmes in the School of Human Development.

"I am interested in all aspects of career development, from examining whether it's beneficial to ask primary school children "what do you want to be when you grow up" to exploring re-careering or career changes in later life.

I am passionate about hearing people's stories, and guidance is deeply rooted in those narratives. Our profession goes beyond supporting individuals through life's key transitions - it's about empowering them with the skills, mindset, and knowledge to realise their full potential.

The MSc and Grad Dip Guidance programmes offer initial education and training in the knowledge, skills and attitudes necessary for practice in the interrelated areas of personal, education and career guidance counselling. A key element of the programme is the strong emphasis on reflective practice and personal growth facilitated by personal counselling, placement practice experience and professional supervision to support and enable personal and professional development.

Students come from a diverse range of backgrounds, including the primary, secondary, further education and tertiary sectors, youth and community work, adult education, employee welfare, state agencies, business, industry, health and human resources. Graduates go on to work in guidance in many varied settings."

Graduate Stories

"A highlight of my time here was being able to study remotely. So I was able to study while working a part time job, this enabled me to get the qualifications I needed to pursue a different career."

Ruth Dervan
MEng Mechanical Engineering

Scan to watch
Ruth's story

"Being an international student, you get to meet people from different countries and share ideas with them."

"The courses align in a proper way where we had practical experience with the assignments, so that helped me grow my skills altogether."

"Challenges are there for us to overcome and be successful in our life, and for someone who values hands-on learning, I think this course would be the perfect fit."

Hrishikesh Mangalekar
MEng Electronic and
Computer Engineering

Scan to watch
Hrishikesh's story

"I wanted to help people and I wanted to make a difference in the world, and I think one of the best decisions I ever made was coming to DCU."

"I would say to anyone who's in very similar circumstances, you're certainly never too old."

Darren Gallagher
Higher Diploma Children's Nursing

Scan to watch
Darren's story

"A highlight of my time at DCU was getting the grade of my very first essay, and I got a first in that, and that was something I never thought I'd be capable of achieving."

"When I finished my undergrad, I thought it was the end of my academic journey...I'm really proud that I've come back and proved myself wrong by doing this Master's."

Employability and Career Development

The DCU Careers Service is here to support you in exploring your options, choosing your next steps, and achieving professional success.

Our dedicated and experienced team works closely with industry partners to help you develop the skills you need to thrive in today's dynamic job market. We focus on helping you acquire, articulate, and apply essential career management skills, ensuring you are well prepared to succeed during your time at DCU and beyond.

Whether you plan to enter the workplace, transition to new roles, build your own career through entrepreneurship or avail of opportunities in emerging areas, DCU Careers Service offers a range of supports and opportunities to allow you to develop your career management skills to successfully navigate your next steps and future progression.

Our Service provides

One-to-one appointments with Career Consultants

Career skills sessions on topics such as Career Planning, CVs and Interview Skills

Employer Events including career fairs and networking sessions

An Online Jobs Board with opportunities targeted at DCU students and recent graduates

Online resources and tools to help you prepare for your career

DCU Alumni Benefits

An International Network

As a graduate of Dublin City University, you will be part of a vibrant, global alumni network of over 120,000 graduates.

Whether you completed your studies recently or some years ago, returning to DCU for postgraduate study comes with a range of alumni benefits that make further study both rewarding and accessible. You will gain access to exclusive alumni benefits, including international networking events, mentorship programmes, and library membership. You can also avail of the DCU Sports alumni membership option and engage with our alumni chapters worldwide.

The DCU Alumni Office's award-winning initiatives include the Emerging Leaders Programme, DCU Career Mentorship Programme, reunions, and recognition through the Alumni Awards. Alumni also benefit from regular updates via monthly newsletters and the annual DCU Voices magazine.

Learn more and keep in touch at: dcu.ie/alumni

Master's Reduced Fee Scheme

This initiative offers a 10% reduction in course fees for DCU graduates enrolling in eligible taught Master's programmes, both full and part-time. Simply include your DCU student number when applying, and the Master's Reduced Fee will be automatically applied.

Graduates who have taken up this opportunity say it has made a big difference to their experience:

"As a full-time student, it is difficult to keep on top of education and hold down a part-time job. The reduction in fees made it a lot easier for me to pay for my Master's at a reduced cost."

"I am self-funding my studies, and it is a significant financial commitment. The reduced fee made me feel more seen and appreciated by DCU, and it gave me an additional boost to keep going with my studies."

"It made me feel valued by DCU, that they appreciated my return to the University."

Visit our Master's Reduced Fee page to learn more: dcu.ie/alumni/reduced-masters-programme-fees-scheme

DCU Global Community

With a vibrant community of over 120,000 students from 128 countries, we invite you to become part of our diverse student body. At DCU, we welcome international students from all backgrounds to be part of our mission to transform lives and societies through education, research, and innovation.

Whether you're from Ireland, the EU, or further afield, DCU offers a truly global experience. You'll have the opportunity to live, study, and collaborate with people from around the world, enriched by the perspectives of our international academics.

We aim to foster an environment of cross-cultural learning that will prepare you for success in a globalised world.

Dublin is a modern, cosmopolitan city rich in history and culture. It's no surprise that many of the world's top employers have established their headquarters here. At DCU, you'll be ideally positioned to launch your career at the heart of this international hub.

Why Study in Ireland?

Studying in Ireland offers a world-class education and a vibrant cultural experience. With globally-renowned universities like DCU, you'll benefit from innovative programmes and practical, industry-focused learning.

Graduates of Irish universities benefit from excellent career prospects. Ireland is the only English-speaking country in the EU while also maintaining strong ties to the UK and USA. This, and the quality of Ireland's graduates, has led to many of the world's biggest multinational companies establishing their European headquarters in the city.

These are just some of the reasons why Ireland is the ideal study destination for those in search of excellent career opportunities.

Ranking 2nd in the Global Peace Index, Ireland offers a safe and welcoming environment for students. You'll experience breathtaking landscapes and stunning coastlines, while also enjoying the vibrant hustle and bustle of Dublin City. Whether you're seeking nature, cultural experiences, or city life, Ireland has something for everyone.

Top Tips for Moving to Ireland

Moving abroad can be an exciting and life altering experience. We are also aware that it can come with some challenges. Therefore we have prepared a few of our top tips for students moving to Ireland to study at DCU.

Find Accommodation Early: Student housing fills up quickly, so it is a good idea to start your search as soon as you can. Student accommodation is a wonderful way to meet fellow students in similar shoes.

Prepare for the Weather: Ireland is known for its mild but wet climate. Invest in waterproof jackets and comfortable shoes. Dublin is very walkable.

Get involved! Join one of 120+ clubs and societies from Basketball, Rugby, to Drama, Karting, Space and Robotics. Clubs and Societies are the best way to make friends and connect with student life in Ireland.

Learn How to Get Around: Ireland's public transport includes buses, trains and trams (Luas). Get a Student LEAP travel card for discount fares and use Transport for Ireland (TFI) for real-time public transport information.

Plan Your Budget: Start by estimating your income and expenses per month. Using Budget Apps like Revolut, cooking some home meals 3-4 times a week, and watching for student discounts can pay off in the long run.

International Non-EU Students

Visa and Immigration: Non-EU students from visa required countries will need an entry visa for Ireland - apply well in advance to avoid delays to your journey to Ireland. Upon arrival, all non-EU students must register with the Irish Immigration Service (INIS) and get an Irish Residence Permit (IRP) card.

Get Health Insurance: All non-EEA students must have private health insurance that covers them from day one in Ireland. Proof of insurance is required at the time of registration with immigration authorities.

Global Recruitment Team

The Global Recruitment Team is here to support you as you prepare to come to DCU. Our team of Regional Advisors are on hand to offer a broad range of guidance and support which will help to make the application process and the overall transition to DCU as seamless as possible.

Please do not hesitate to contact us at: dcuglobalrecruitment@dcu.ie

Immigration Support

The Department of Justice, Home Affairs and Migration provides essential information for students wishing to apply for study visas in Ireland.

DCU aims to support students through their visa applications process, providing support where we can.

We also host visa and immigration information webinars through the summer.

For more information please visit: irishimmigration.ie

Student Support and Development

Throughout your academic journey at DCU, our Student Support and Development team provides personal, academic and professional support and guidance to all registered international students. They host a variety of workshops and events specifically tailored for international students to help you adapt and settle into life at DCU and in Dublin.

DCU's Student Advice and Learning Skills Centre (SAL) is a one-stop shop where international students can receive support to help you transition to DCU. Students can avail of advice and guidance in all areas including academic, personal, financial and professional - ensuring that you reach your full academic and personal potential.

Careers Service

With 95% of our graduates either employed full-time or pursuing further study within six months of graduation, DCU takes pride in its award-winning Careers Service. We are here to support international students to navigate the Irish job market - identifying career paths, refining your CV and LinkedIn profile, and preparing you for interviews.

Throughout the year, our Careers Service hosts various events, including career fairs and events specifically tailored for international and postgraduates students. These events provide opportunities to connect with employers, gain valuable insights, and prepare for life after graduation.

Working in Ireland as an International Student

Ireland's Employer Ecosystem

Ireland is the European base for over 1,000 leading multinational companies in sectors such as IT, pharmaceuticals, and finance. Major companies like Google, IBM, Meta, Pfizer, Oracle, and Deloitte have all chosen Ireland as their hub, creating a demand for a skilled and educated workforce to support their success.

Working in Ireland while Studying

Students attending a full-time course who have an Irish Residence Permit card are entitled to take up casual/part-time employment while studying in Ireland provided that their course of study is included on the government's list of visa-eligible courses, known as the ILEP.

This will entitle you to undertake part-time work for up to 20 hours per week during term time, and up to 40 hours full-time work per week during two standardised periods of 15 December to 15 January and between 1 June and 30 September. These dates are subject to change and are fixed for all non-EU students, regardless of the actual programme teaching calendar for their course.

In order to work in Ireland you will need to get a Personal Public Service Number (PPSN), but you need to have evidence of a job offer to secure one. The first step is to find work, and then apply for a PPSN. You can find out more from Citizens' Information: citizensinformation.ie

Working in Ireland after you Graduate

After successfully completing your studies you can take advantage of a "stay-back" visa to remain and work in Ireland.

International students who complete an undergraduate degree at DCU can apply for the Third Level Graduate Programme (Stamp 1G). Stamp 1G allows you to work in Ireland for **12 months** from the date of issue of final results.

International students who complete a Master's Degree, a Postgraduate Diploma or a PhD can also apply for the Third Level Graduate Programme (Stamp 1G). This allows you to work in Ireland for **24 months** after you graduate. Full details can be found at: irishimmigration.ie

Scholarship Information

DCU offers a range of International Student Scholarships.

DCU Merit Scholarship

DCU offers partial merit-based scholarships to some non-EU students. You are automatically considered for a scholarship when you apply as a non-EU student to DCU. We'll let you know if you have qualified for a scholarship when we contact you to advise if your application to study at DCU has been successful.

Faculty of Science and Health International Scholarship

This scholarship is available for Non-EU applicants who have received an offer to study an eligible postgraduate programme in the Faculty of Science and Health. Successful applicants will receive a €5,000 fee reduction on the full-time 2026-2027 non-EU tuition fee.

Eligible programmes for 2026-2027 are:

- DC739 - MSc in Diagnostics and Precision Medicine
- DC734 - MSc in Bioprocess Engineering
- DC776 - MSc in Biotherapeutics

Humanities and Social Sciences Bursary

This merit-based bursary is available for high-achieving non-EU applicants who have received an offer to study on a postgraduate programme in the Faculty of Humanities and Social Sciences. Successful recipients will receive a €2,000 fee reduction on the full-time 2026-2027 non-EU tuition fees for their postgraduate programme. All non-EU applications to a postgraduate programme in the Faculty of Humanities and Social Sciences are automatically considered for this bursary. Only successful recipients of the bursary will be notified via email.

Faculty of Engineering and Computing International Scholarship

This scholarship is available for non-EU applicants who have received an offer to study on eligible postgraduate programmes in the Faculty of Engineering and Computing. Successful recipients will receive a €5,000 fee reduction on the full-time 2026-2027 non-EU tuition fee.

Eligible programmes for 2026-27 are:

- DC814 - MEng Mechanical and Manufacturing Engineering
- DC836 - MSc in Computing
- DC883 - MEng Electronic and Computer Engineering
- DC896 - MSc Electronic and Computer Technology

All non-EU applications to a postgraduate programme in the Faculty of Engineering and Computing are automatically considered for this bursary. Successful recipients of the bursary will be notified via email.

Business School International Scholarship

This scholarship is available for non-EU applicants who have received an offer to study on eligible postgraduate programmes in DCU Business School. Successful recipients will receive a €2,000 fee reduction on the full-time 2026-2027 non-EU tuition fee.

Eligible programmes for 2026-27 are:

- MSc in Human Resource Management
- MSc in International Accounting and Business
- MSc in Global Strategy (Digital Disruption)
- MSc in Accounting
- MSc in Finance
- MSc in Management (Business)
- MSc in Management (Strategy)
- MSc in Digital Marketing
- MSc in Business Analytics
- MSc in Management (Operations and Supply Chain)

All non-EU applications to a postgraduate programme in DCU Business School are automatically considered for this bursary. Successful recipients of the bursary will be notified via email.

Students are also eligible to apply for scholarships from external sources such as the Irish Fellows Programme and The Government of Ireland Scholarship. Certain conditions may apply.

Details can be found at:
dcu.ie/scholarships

Life at DCU

Health and Fitness

At Dublin City University, we are passionate about fostering a vibrant sporting community that champions participation, engagement, excellence and growth through sport. We are committed to creating an environment where students, staff, and the wider community thrive in sport, physical activity and well-being.

DCU Sport caters to everyone, from complete beginners and fitness enthusiasts to high-performance athletes, teams, and volunteers. Whatever your level, DCU Sport has a membership, sports club, fitness class, programme or volunteering opportunity for you.

Whether you are starting your fitness journey or aiming to excel in your sport, we provide a space where everyone can connect, grow, and thrive.

Find your passion, chase your goals, and feel better every day by getting active in an inclusive, fun environment. Explore a world of opportunities for students, staff, alumni, families, and the local community - you'll be glad you did.

For more information on health, fitness or sport at DCU please visit our website: dcu.ie/dcusport

Accommodation

On our Glasnevin Campus, our College Park apartments have a dedicated postgraduate block, which is available on a 9-month basis, from September to May. These apartments contain 5 double en suite bedrooms with both wifi and fixed-line internet access.

Our postgraduate apartments on the Glasnevin Campus offer high-quality accommodation for over 100 postgraduate students in the heart of the research community on campus. The accommodation is let on a 50-week basis only, the majority of rooms being let as single occupancy bedrooms, however, a limited number of double occupancy rooms are also available.

On the All Hallows Campus, we have a limited number of rooms available for 9-month occupancy. There are 67 bedrooms available in Purcell House to students at all levels of study. Accommodation is in single or double bedrooms (single occupancy only) with either en suite or shared bathroom facilities. Each bedroom has a study area and wifi access. There is a large communal kitchen and shared lounge areas.

Please note that all students including postgraduates will be charged a €50 administration fee for 2026/2027 when making an application to DCU Rooms.

For more information on DCU accommodation, visit: dcuaccommodation.ie/accommodation/dcu-post-grad-students

Student Services and Supports

Student Advice and Learning Skills Centre

The Student Advice and Learning Skills Centre is the place to go for all information on student support at DCU. We offer advice and guidance on everything from settling into university to exam preparation and financial assistance. Students can make a one-to-one appointment or drop in to see a Student Advisor.

The Learning Support Service also offers workshops and one-to-one meetings to help students with various aspects of learning at Third Level. We also offer extensive online resources through DEVELOP, our digital resource hub. Our Writing Centre is very popular with postgraduate students, helping them to enhance their writing skills.

The Centre also offers life coaching on a one-to-one basis or through the Pathways to Success programme.

For more information on the Student Advice and Learning Skills Centre, visit dcu.ie/sal or email student.support@dcu.ie

Student Health Service

The Student Health Service provides on-campus primary healthcare to all DCU students. We take care of the physical health needs of our students and provide information about external specialist services where relevant. DCU is a health-promoting university and offers a range of services and initiatives to help you enhance both your physical and mental health. For further information, go to dcu.ie/health

Counselling and Personal Development Service

This professional and confidential service is available to all registered postgraduate DCU students.

The service is staffed by counselling psychologists/psychotherapists and psychotherapists at an advanced stage in training. We offer one-to-one counselling, professional crisis support and expert advice on a range of personal and psychological health and developmental issues. For further information and to register with the service visit dcu.ie/counselling

Disability and Learning Support

Our aim is to promote equality of access for learners with disabilities, specific learning difficulties, mental health difficulties, and ongoing medical conditions. In line with best practice guidelines, we coordinate a range of supports for students who are registered with the service to ensure they have equity of access to their studies. For further information go to dcu.ie/disability

DEVELOP Online Resource Hub

DEVELOP is an online resource hub for all DCU students. There are eight different areas of support including Wellbeing, Study Skills, Mental Health, Life Skills, Career Focus, Digital Skills, Our Services, and Settling In. Resources can be accessed 24/7 and will benefit you throughout your time at DCU. DEVELOP services are available to registered students via the DCU Loop App.

Entry Requirements

In general, the entry requirement for all taught graduate programmes is a primary degree of at least Second Class Honours standard from a recognised university or degree-awarding body. In some cases, approved equivalent qualification from a recognised professional body will suffice.

As part of the selection process, an interview may be required. In some cases, candidates not possessing the above entry qualification may be admitted provided that they can demonstrate exceptional aptitude or ability and/or substantial relevant work experience in a field related to the programme.

In line with DCU's Recognition of Prior Learning Policy, candidates who do not have the appropriate level of academic attainment for direct entry may apply for access via the Recognition of Prior Learning process.

Prior learning may be formal accredited learning or experiential/uncertified learning which includes the knowledge, skills and personal qualities acquired through life, work experience and study which are not formally attested. Further information on Recognition of Prior Learning can be found at: dcu.ie/recognition-prior-learning/about-rpl

Detailed entry requirements and specific guidance and information relating to academic and other requirements associated with the programme are available in each of the programme descriptors on our website. Prospective applicants for a specific graduate taught programme should consult the online prospectus: dcu.ie/courses

English Language Requirements

Applicants whose first language is not English must provide evidence of equivalent competence in the English Language in a recognised English language test, as specified below. The minimum standard in the English language varies by faculty. For more information visit: dcu.ie/registry/english-language-requirements-non-native-speakers-english-registry

Your English language certificate must be awarded within two years of the start date of your DCU programme.

In exceptional circumstances, results in examinations other than those published may be accepted as proof of competence in the English language. This may include non-native speakers of English who have completed their education through the medium of English in a country where English is the official language. Please include the details of any English language examinations and proof of successful completion when applying to DCU.

How to Apply

Postgraduate Taught Programmes

Candidates seeking admission to all full-time and part-time postgraduate taught programmes must apply online through DCU's Student Application Portal which can be accessed at: dcu.ie/applicationportal

Applicants can apply for up to three taught programmes or one research programme when making an application to DCU.

Programmes should be selected in order of preference. The cost of applying is €50 and is a non-refundable fee payable to DCU.

You must upload documentation relevant to your application through your account, such as certified transcripts for every year of study including the overall grade awarded, passport, and, if applicable, the English Language requirement. Other additional documentation may be requested during the application stage and must be provided prior to DCU's assessment.

On receipt of the application fee, your application will be available to view on the system. Applicants are notified by email. It is, therefore, imperative that applicants have a secure email account and review it regularly for updates, as no other means of communication between DCU and prospective applicants will be used. If you are successful and receive an offer, you will be required to make a €500 deposit via the student applicant portal in order to accept your place.

Closing Dates for Applications

EU and non-EU applicants to full-time and part-time postgraduate taught programmes should note that each programme has an initial closing date indicating when applications should be submitted. Applications may be reviewed by DCU Admissions before or after the closing date.

Please note that all Postgraduate programmes offered through DCU have entry requirements. In addition to qualifications, some programmes require additional information and applicants are asked to familiarise themselves with their programme(s) of choice before making an application. For details on the current closing dates applicable to the programme you are interested in go to: dcu.ie/courses

For further information or assistance with your application please call our Student Enrolment Team on Registry at:

Telephone: +353 (0) 1 700 5338

For EU postgraduate applicant queries, please visit dcu.ie/registry/eu-postgraduate-taught-admissions or email postgraduateadmissions@dcu.ie

For non-EU postgraduate applicant queries, please visit dcu.ie/registry/international-admissions-undergraduate-and-postgraduate or email internationaladmissions@dcu.ie

Pursuing a Research Based Programme at DCU

For more information on the postgraduate research and PhD opportunities offered at DCU please visit each faculty's section of our website. Following an application and acceptance of a place on a research programme, post-registration support can be found by contacting the Graduate Studies Office. For further details visit: dcu.ie/graduatestudies

Finance and Funding

Postgraduate Fees

Separate fees are set for each programme. Fees are payable for each academic year, or each stage of your programme. Students are liable to pay revised fees annually for the duration of the programme. Fees may be subject to annual increase. For current fee information, visit: dcu.ie/fees

Fees for International Students

For information on international student fees (non-EU entrants) visit: dcu.ie/fees/postgraduate-fees-2025-26

Grants and Scholarships

Postgraduate students can continue their Higher Education Grant or apply for one if they satisfy the means test and have not completed another postgraduate course. For more information on maintenance grants, visit: studentfinance.ie

Faculties also run individual scholarships for certain taught postgraduate programmes. For further information, visit: dcu.ie/graduatestudies/scholarships-opportunities.shtml

Research Councils

Research Councils are a major source of financial support for EU students wishing to register for postgraduate research degrees. However, funding for certain taught programmes is occasionally available. For more information, visit: research.ie

Sponsorship from your Employer

If you are working and want to study part-time, some employers may help you with your course fees, or by offering flexible working.

For further details visit: dcu.ie/fees/Employer-Invoice

Cost of Living

In order to prepare for your time in Ireland, we have provided some information on the cost of living in Dublin. This will help you in your planning for the coming year!

For further details visit: dcu.ie/students/financial-survival-university-financial-assistance-service

Postgraduate Programmes

Faculty of Humanities and Social Sciences

DCU's Faculty of Humanities and Social Sciences has seven schools and is the largest faculty in the University, offering 29 postgraduate degrees. Our courses are modern, interactive and challenging, taught by experts with strong links to industry who always have their fingers on the pulse of what's happening in the real world. Our state-of-the-art facilities are second to none, with a media studio plus multimedia and language labs with the latest technology.

Our students often enjoy the benefit of expertise from more than one school and discipline such as the MSc in Climate Change: Media, Politics and Society where students gain expertise delivered by both our School of Communications and the School of Law and Government. Many of our postgraduate courses are also accredited by relevant professional bodies.

English in DCU is the top-ranked subject in the University, positioned in the Top 150 of the QS World University Rankings by Subject.

Humanities and Social Science subjects including Languages, Linguistics, Communications are all ranked within the top 200 offered worldwide. DCU's Fiontar agus Scoil na Gaeilge is the largest third-level Irish department in the country.

DCU Business School

DCU Business School is accredited by EQUIS, AACSB and AMBA, giving it the triple crown of accreditations and placing it among the top 1% of Business Schools worldwide. Furthermore, DCU is the only university in the Republic of Ireland to be accredited by the Small Business Charter, providing further endorsement of the school's connection with industry.

Our globally-ranked Master's Degrees offer clear routes to career progression in a wide range of business areas. Our internationally respected academic faculty have thought leadership, industry experience and deep, active, research expertise that ensures our courses stay at the cutting edge. Meanwhile, our classroom environment allows a rich exchange of real-world business experience and problem-solving that is equally valuable.

We will match your ambition and career goals with an exceptional specialist business education that will allow you to progress confidently to the next stages of your career.

* All part-time course fees must be paid on an annual basis for the duration of the programme.

* All programmes and fees listed are accurate at the time of print. For any potential updates please review dcu.ie/postgraduate

** The MSc in Global Management (Digital Disruption) is unique in its format and can be studied through three paths:

1. Full-time one year programme completed at DCU Business School. This programme confers a single MSc degree from DCU (apply here business.dcu.ie/course/msc-global-management)
2. Spend semester one in either Universidad de las Américas Puebla in Mexico, Università Cattolica del Sacro Cuore (UCSC) in Italy, or Goodman Business School at Brock University in Canada

before coming to DCU in semester two. This programme confers a single MSc degree from DCU (apply at ipbsmgm.com)

3. Spend one semester in DCU and either ESB Business School at Reutlingen University, Germany OR NEOMA Business School in Reims, France (apply at ipbsmgm.com)

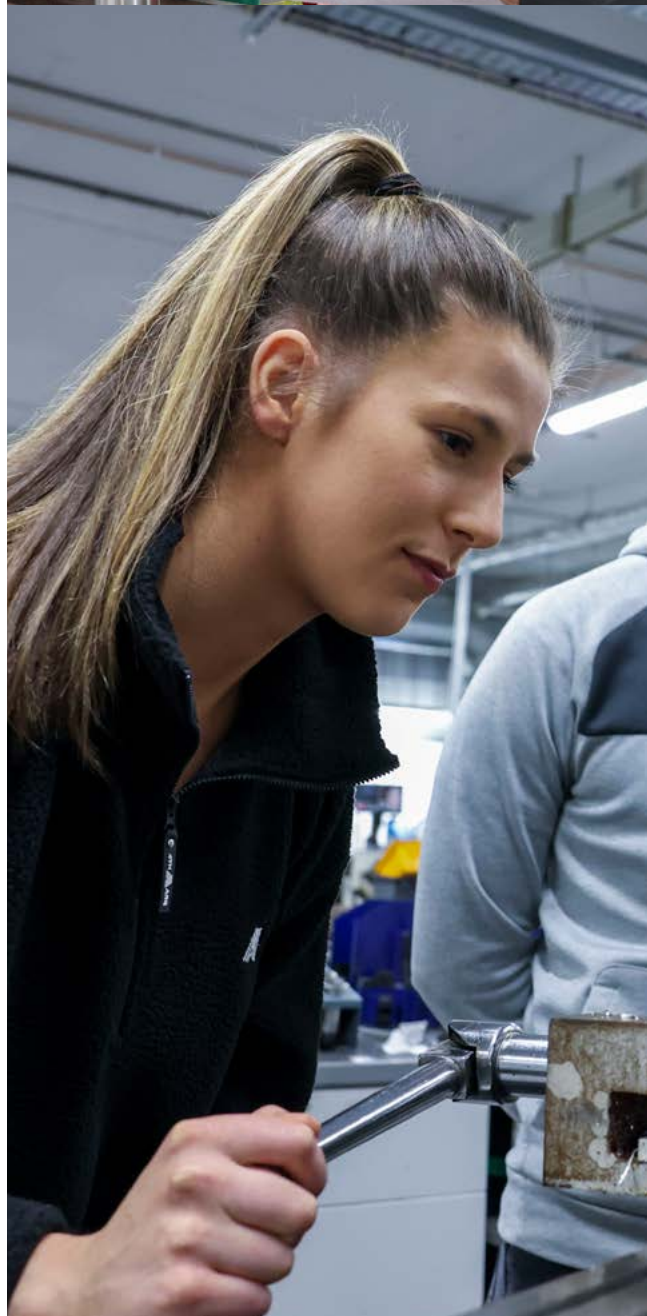

Research Studies (including Master's by Research and PhD studies) can be found on the research section of the DCU Business School website at: business.dcu.ie/phd-programme

For these programmes a scholarship is available for Non-EU applicants who have received an offer to study on eligible postgraduate programmes in the School of Business. Successful recipients will receive a €2,000 fee reduction on the full-time 2026–2027 Non-EU Tuition fee.

Faculty of Engineering and Computing

The Faculty of Engineering and Computing is home to three Schools and hosts or participates in several large-scale research centres. We offer a variety of degree programmes at Bachelor's, Master's and PhD levels. Additionally, online Level 9 courses are now enabling those in employment to upskill in areas such as Artificial Intelligence, Sustainable Energy, Data Analytics and the Internet of Things. Our graduates continue to be highly sought after by leading industry members and organisations, and their continued employability is assured through the Faculty's ever-deepening links with industry partners and an evolving curriculum that allows real-world work experience, industry-led team challenges and global engagement in line with DCU's internationalisation strategy.

The Faculty of Engineering and Computing offers a supportive, innovative and practical learning environment in classes and tutorials. Our students benefit from their engagement with our research-active staff, while enjoying the experience of lab-based environments. Overall, we continue to commit ourselves to strive for ever more innovative approaches to teaching and learning, and, in doing so, to bring about a meaningful transformation in the lives of our students, alumni and the broader society.

Faculty of Science and Health

Are you curious about the behaviours that drive our physical world? Is your appetite whetted by scientific discoveries that push the boundaries of our existence? Are you driven to work with individuals and communities to ease the burden of illness and maximise health and wellbeing?

Welcome to the Faculty of Science and Health. A place to discover, problem-solve, experiment and explore. An inclusive environment that serves to innovate and inspire. Our internationally recognised centre of excellence thrives on the enthusiasm and dynamism of its people.

Our mission is to foster and deliver education, research, and professional and practice development in science and health that is of national and international significance. Together the Schools and Centres provide a unique set of synergies to advance education and research in science and health and to support DCU to pursue its goals to transform lives and society. Staff in the Faculty have strong links to industry and also work closely with a range of community, health, and education organisations within the local community.

DCU Institute of Education

DCU Institute of Education is the newest faculty of Dublin City University and is based in DCU St Patrick's Campus, Drumcondra. Established in 2016 as Ireland's first university faculty of education, it has a staff of more than 140 full-time academics, an administrative team of 30 and a student body in excess of 4,000. The Institute brings together students of education across all sectors from early childhood, to primary and post-primary, and further and higher education. As well as providing a range of undergraduate programmes in education, the Institute offers a rich menu of taught and research-based postgraduate programmes, at doctoral, masters, diploma and certificate levels.

As a centre of expertise and excellence in teacher education and education more generally, the Institute hosts a range of research centres in key areas of priority and has an ambitious and growing programme of research. With internationally recognised experts in education policy, inclusive and special education, curriculum and pedagogy, assessment, literacy, evaluation and teacher education, the Institute provides a dynamic learning and working environment. As one of the world's leading young Universities, DCU has established its fifth and newest faculty out of a conviction that studies and research in education and the preparation and support of teachers are central to the transformation of lives and communities.

Chat with our students

DCU's 'chat with students' feature allows you the opportunity to engage with current postgraduate students who are studying with us right now.

We have a team of dedicated student ambassadors who join us from across our five faculties, representing a wide variety of our postgraduate programmes.

So if you want to find out what our programmes are like from a student's perspective, or simply want some advice from a student who comes from the same region as you, simply scan the QR code below or go to **dcu.ie/studentrecruitment/chat-dcu-students** and our students will be happy to help!

Please note that the information contained in this prospectus is correct at time of print.

For updated information on all postgraduate programmes at DCU, visit: dcu.ie/pgcourses
